EGYGRAFX

Wide-Format Printing Technology

B2B Platform Proposal & Commercial Quotation

PROJECT

EGYGRAFX Corporate Website

Full multi-page B2B website for EGYGRAFX — a large-format printing solutions distributor serving Egypt & the Middle East. Transitioning legacy listings to lead generation.

PREPARED FOR

Eng. Ashraf

EGYGRAFX

Executive Director

01 Executive Summary & Brand Vision

EGYGRAFX is a recognized market leader with over 30 years of experience, 3,500+ fleet installations, and partnerships with premier global brands including HP, Monti Antonio, and GBOS. This proposal shifts the platform from a traditional product listing directory toward a dynamic, customer-centric B2B lead generator:

YOUR APPLICATIONS ↔ OUR SOLUTIONS

The B2B Sales Story: Nour's Journey

To illustrate how this system drives business growth, consider Nour — a textile business owner expanding into fast fashion:

01 *The Entry*

Nour lands on the new EGYGRAFX.COM — fast, premium, and highly professional.

02 *Application Hub*

Greeted with: "What is your application?" — she clicks Home Textile & Fast Fashion.

03 *Integrated Suite*

Instantly sees the DGI Poseidon II with matched INKTEX inks and transfer papers — a complete solution in one screen.

04 *Lead Capture*

Selects her configuration → clicks Request a Quote. A branded PDF lands in her inbox; the sales desk gets a pre-qualified lead sheet instantly.

05 *The Close*

Your team calls Nour with a tailored proposal — the deal is closed.

02 Global Information Architecture & Sitemap

- *Home Gateway*
Interactive applications grid, live installation counters, and primary supplier brand logos.
- *Applications (9 Sectors)*
Home Textile & Fast Fashion · T-Shirts & Piece Printing · Carpet, Mats & Rugs · Hi-Tech Industrial CAD/CAM · Signage & Display · Wall Covering & Home Décor · Outdoor Advertising · Packaging & Labeling · Promotional & Personalization
- *Products Catalog*
Filters for printers, finishing cutters, calenders — sorted by brand.
- *Consumables Catalog*
Inks (sublimation, latex, UV, solvent) · Papers & PET Films · Replacement Parts (filters, printheads, capping stations).
- *Fleet Support & Services*
Installation requests, preventative maintenance, ICC profiling, and onsite training schedules.

03 Visual Rebranding Synthesis

Applying the Xerox Rebranding Framework, we transition the legacy identity into a warm, high-tech B2B supplier profile.

VISUAL ELEMENT	LEGACY IDENTITY	PROPOSED REBRAND
Typography	Sharp serif all-caps — EGYGRAFX SAE	Bold rounded geometric sans — EGYGRAFX.
Iconography	Literal CMYK color grid block	Typography-Only Wordmark (Clean corporate focus)
Color Palette	Cyan, Magenta, Yellow offset channels	Deep Crimson · Digital Coral · Charcoal Slate
Visual Friction	High — rigid, traditional corporate	Low — warm, human-centered innovative tech hub

04 How the Technology Works

- **Digital Filing Cabinet (Headless CMS)**

Firebase Firestore + Clerk Auth admin dashboard. Team updates machine specs or pricing with one click — no developers, no maintenance fees.

- **Smart Google Signposts (Programmatic SEO)**

Every machine, brand, and category auto-generates a dynamic, high-ranking Google page. Clients searching 'Kyocera sublimation Egypt' land directly on your product.

- **Automated Sales Desk (RFQ Engine)**

Runs 24/7: captures exact machine configs, delivers PDF brochures automatically, and routes pre-qualified hot lead sheets to your sales team.

- **72-Hour Live Deploy (Domain Integration)**

The production build is connected directly to your existing EGYGRAFX.COM domain — no waiting, no migration. Your new platform goes live within 72 hours of final sign-off.

- **Role-Based Staff Access (Team Permissions)**

Every EGYGRAFX staff member gets a defined login role — Marketeer, Copywriter, or IT/Admin — each with tailored permissions so the right people access only the tools they need.

- **Live Analytics & Heatmap Dashboard (Traffic Intelligence)**

Real-time visitor traffic, scroll heatmaps, click maps, and session recordings surface exactly which application sectors attract the most interest and where the site needs refinement or deeper content focus.

05 Commercial Line Items

DESCRIPTION	QTY	AMOUNT (USD)
1. Website in 72 Hours — Base Package Custom UI/UX design, responsive mobile-first build, SEO-optimized structure, contact form & analytics, unlimited revisions, deployed on Google Cloud Run. Stack: React, HTML/CSS, Vercel.	1	\$300.00
2. Extended Multi-Page Architecture 9-section navigation structure (Home, About, Products, Applications, Solutions, Consumables, Service, Contact) with consistent layout system, sub-page templates, and internal linking.	1	\$150.00
3. Supplier & Brand Directory Pages Structured pages for 12+ supplier brands (ORIC, HP, BYDi, JHF, Monti Antonio, GBOS, DGI, LDP, MagicJet, WitColor, Summa, Neolt) with spec layouts.	1	\$120.00
4. Applications & Solutions Category Pages 9 industry verticals (Home Textile, T-Shirts & DTG, Carpet & Rugs, Signage & Display, Wall Covering, Outdoor Advertising, Packaging, Automotive CAD/CAM, Promotional) with dynamic mappings.	1	\$100.00
5. Consumables Section Inks, Paper & Film, and Spare Parts sub-pages with clean product listing layouts.	1	\$50.00
6. Headless CMS & Cloud Database Integration Firebase Firestore NoSQL database setup. Includes secure Clerk administrative dashboard for real-time stock/spec updates. Role-based access: Marketeer, Copywriter, IT/Admin.	1	\$450.00
7. Interactive RFQ Configurator & Lead Engine B2B configuration portal. Allows custom printhead/ink/width selections, triggers automated PDF brochure emails, and logs pre-qualified leads.	1	\$280.00
8. Live Analytics & Heatmap Dashboard Real-time scroll & click heatmaps, session recordings, and Google Analytics tracking to audit buyer actions and maximize high-performing sectors.	1	Included

Subtotal	\$1,450.00
Tax / VAT (0.5%)	\$7.25

Total **\$1,457.25**

06 Timeline & Payment Milestones

Four clear, verified handover milestones. Timeline: 25–30 business days from asset delivery & database schema sign-off. Upon final approval, the production build connects to EGYGRAFX.COM and goes live within 72 hours.

PAYMENT	AMOUNT	MILESTONE	DELIVERABLES
25%	\$362.50	Milestone 1 Deposit & Design	Complete visual rebranding mockups, logo guidelines, sitemap layout sign-off.
30%	\$435.00	Milestone 2 Staging Integration	Frontend catalog and all 9 application hubs deployed to staging.
35%	\$507.50	Milestone 3 Backend & DB Lock	Firestore database collections, Clerk admin panel, RFQ configurator deployed.
10%	\$145.00	Milestone 4 Production Handoff	Go-live domain config, automated SEO registration, team training handoff.

07 Ongoing Operational Costs

Modern serverless architecture keeps ongoing costs exceptionally low. Since EGYGRAFX already owns EGYGRAFX.COM, recurring expenses are:

SERVICE	COST	FREE TIER DETAILS
Google Firebase Database	\$0 / month	Free tier covers up to 50,000 reads & 20,000 writes per day
Clerk Admin Authentication	\$0 / month	Free tier covers up to 10,000 active monthly users
Vercel Edge Hosting	\$0-\$20 / month	Free tier standard; \$20/mo Pro optional for edge security
Brochure Email (Resend)	\$0 / month	Free tier covers up to 3,000 transaction emails per month

08 Platform Architecture & Customer Flows

The diagrams below map exactly how the platform behaves — from the moment a B2B buyer arrives, through the site's navigation structure, down to how your team manages content behind the scenes.

1 · The B2B Buyer's Journey

Instead of forcing buyers through thousands of disjointed parts, the platform routes them by industry sector on arrival. A buyer like Nour self-identifies, lands on a dedicated hub, sees best-fit machinery with auto-matched consumables,

2 · Site Navigation Architecture

The home gateway branches into four pillars — Applications, Products, Consumables, and Support. The Applications branch expands into the 9 sector hubs, each leading to individual machine spec pages. Every node becomes its own

3 · Headless Backend & Data Model

Your team edits content through a role-secured dashboard — Marketeer, Copywriter, and IT/Admin, each with scoped permissions via Clerk authentication. Changes write to Firestore collections that cross-reference each other: a

09 Technology Stack: Serverless vs. WordPress

To ensure a transparent technical rationale, below is a direct comparison showing why the proposed modern serverless stack is vastly superior to a traditional monolithic WordPress setup for EGYGRAFX's specific enterprise requirements.

OPERATIONAL ATTRIBUTE	MONOLITHIC WORDPRESS (LEGACY)	PROPOSED SERVERLESS STACK
<i>Speed / Load Time</i>	SLOW — Queries heavy databases on every page load, slowing image deliveries.	BLAZING FAST — Pages statically pre-rendered & served globally from CDNs.
<i>Hacking & Security</i>	HIGH RISK — Target of 90% of web hacking attempts. Heavy maintenance updates.	IRONCLAD — Zero public-facing databases exposed. Hacker-proof by design.
<i>Catalog Database</i>	RIGID — Designed for blogs; struggles with complex machinery-to-parts relation structures.	FLEXIBLE — Google Firestore maps rich catalog lists & spec relationships naturally.
<i>Monthly Support</i>	HIGH — Requires monthly maintenance contract SLA for security patches & fixes.	ZERO — Deployed serverless codebase runs indefinitely with no developer support.
<i>Hosting Overhead</i>	\$25 – \$80 / month for dedicated high-bandwidth B2B-grade server hosts.	\$0 to \$20 / month max — scales automatically inside Google free quotas.

STRATEGIC RECOMMENDATION

For EGYGRAFX, the Serverless Stack is the optimal business choice. It represents a secure, high-speed corporate asset that eliminates monthly developer maintenance fees and provides the exact relational database structure required to power Nour's B2B inquiry journey cleanly and at scale.

10 Handoff & Authorization

This proposal represents a complete agreement between Mitry Visuals and EGYGRAFX. Signing confirms acceptance of the scope, pricing, and milestone schedule detailed above.
